

GENERAL DESCRIPTION AND MATERIALS

- Material : **Microporous film laminate fabric with PP**
Microporous film bonded to nonwoven material
- One size
- Length : 50x24x15 cm

SPECIFIC ADVANTAGES

- **Microporous +PP** can be used in any non-hazardous applications to protect against dirt, light liquid splashes, and particles.
- Provides **fluid proof protection** and **great breathability**.
- **Ideal** material for **extended wear conditions** where **fluid contact is expected**.
- **Microporous film**: Keeps non-hazardous particulates and liquids out while allowing moisture from perspiration to dissipate.
- **SpunBonded Polypropylene**: Durable, soft fabric provides comfortable extended wear

MAIN APPLICATION FIELDS

- **Industrial Applications**
- **Agricultural** industries

PACKAGING

- **200 pieces** in a carton
- **2 polybags of 100 pieces**

STANDARDIZATION

This article is conform to the personal protective equipment submitted to
The CE certificate n° DPI 771 AT 1479-1 by ANCCP (organisme n° 0302)

EN 13034:2005 + A1:2009
Type 6 = Resistance limited to splashes

EN 1149:2008
Antistatisme

EN14126:2003/AC:2004
Infective agents
