The XComfort is a range based on flame retardant solution that gives the cotton fiber fabrics a durable flame retardant finish.

This flame retardant finish is not a coating, it is a chemical bonding with the molecular structure of natural cotton. In the event that the fabric is exposed to fire a carbon char is formed, this carbon char works as a heat shield and also controls the spread of the flame.

This fabrics offer its users a superior comfort Its inherent softness is enhanced by its ability to keep the wearer cool in hot climates, and warm in cold.
